Turning Vane – 3m

Turning Vane is made from cold roll formed galvanised steel. Twin walled vane construction can provide cost savings compared to one-piece configuration.

There is no need for mechanical or welded fixing of the turning vane to the mounting track as they can be quickly assembled using a Fixing Tool. Turning vane and mounting track are used in the construction of square throat bends to manage airflow.

Please note our Turning Vane and Mounting Track are each sold separately.

Variant Code:	3112 01878
Field of application:	For use in airduct systems to minimise noise, vibration and friction in air turns.
Material:	Strap Steel
Weight:	0.4mm – approx. 0.55kg/m
Width:	68mm
Length:	3m
Notching Distance:	12mm
Thermal Properties:	Up to +110 °C
Production method:	Cold roll forming
Remarks:	Complies with DW 144 -Specification for Sheet Metal Ductwork
